Welcome to the Department of Epidemiology at the Robert Stempel College of Public Health and Social Work. Epidemiology is the foundation of public health science that is concerned with the study of patterns and determinants of health and disease in order to identify ways to reduce disease burden and improve population's health. There has always been a critical need for epidemiologists, and this need is projected to increase in the future due to the aging of the population and the growing burden of chronic and degenerative disorders. At the same time emerging infectious diseases, such as COVID-19 and monkeypox, have been a wake-up call to epidemiologists worldwide that the battle with infectious diseases is far from being over.

Our PhD program is tailored towards meeting these two main trends in population health as we strive to prepare epidemiologists who can not only respond to current health problems in the society, but also be ready to face future challenges to health posed by our ever-changing environment and lifestyles. We pride ourselves on being a student-centered department, where our students actively participate in our educational and training activities, continuously inform and shape the evolution of our department and programs. Our goal is that the PhD program will provide a fulfilling experience for our students both professionally and socially.

I am very eager to welcome each of you as you embark on your educational journey at our department. Buckle up and get ready for the ride.

Mary Jo Trepka, MD, MSPH
Professor and Chair
<table>

</table>

**Mary Jo Trepka, MD, MSPH**  
*Professor and Department Chair*  
Research interests are in the epidemiology and control of infectious diseases, the social determinants of health disparities in HIV/AIDS care outcomes, and the role of patient centered care in mitigating the effects of these social determinants on HIV care outcomes.

**Wasim Maziak, MD, PhD**  
*Professor*  
Research interests are the study of emerging tobacco products, chronic diseases and risk factors, public health in developing countries, and regulatory and policy solutions to public health problems.

**Nasar U. Ahmed, PhD, MPS**  
*Associate Professor*  
Research focuses on health disparities in cancer screening, physician recommendation for preventive health behavior, and interventions designed to address these issues.

**Gladys E. Ibañez, PhD**  
*Associate Professor*  
Research interests are HIV and substance use, Latino and sexual minority health. She also studies intervention development and integrative and complementary health approaches.
### Faculty Profiles

<table>
<thead>
<tr>
<th>Diana Sheehan, PhD, MPH</th>
<th>Assistant Professor</th>
</tr>
</thead>
<tbody>
<tr>
<td>Research interests are in health disparities, HIV, and Latino health. Her current research focuses on disparities along the HIV care continuum, as well as on the effect of neighborhood and social context on health behaviors and outcomes.</td>
<td></td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Olatokunbo Osibogun PhD, MBBS, MPH</th>
<th>Assistant Professor</th>
</tr>
</thead>
<tbody>
<tr>
<td>Research interests are in tobacco use and preventive cardiology. She is mainly focused on understanding the etiology and progression of dual/polytobacco use behaviors among adolescents and adults, with an additional interest in improving cardiovascular health and recommending solutions through scientific evidence to advance public health.</td>
<td></td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Melissa Ward, PhD, MPH</th>
<th>Assistant Professor</th>
</tr>
</thead>
<tbody>
<tr>
<td>Research interests include using mixed-methods approaches to examine health disparities and disparities in access to care, with a particular focus on barriers to care for women with opioid use disorder. She also studies women-centered and patient-centered approaches for HIV care.</td>
<td></td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Vukosava Pekovic, MD, PhD, MPH</th>
<th>Clinical Associate Professor/Academic Public Health Director</th>

For More Information, Please Visit
https://stempel.fiu.edu/research/epidemiology-research-faculty-spotlight/
Epidemiology is “the study of the distribution and determinants of health-related events in human population.” The science of epidemiology is based on two basic concepts: “careful systemic observation of disease phenomena” and “logical interpretation of observation.” Thus, the field of epidemiology requires applying your senses to observe the natural phenomena and logical thinking to interpret these phenomena. It is the science of prediction, prevention, and promotion of health events.

The borders of epidemiology are always expanding. Modern epidemiology is diverse and can involve the epidemiology of acute and chronic diseases, molecular and genetic aspects of disease, environmental and occupational health conditions, and behavioral and social science to understand the phenomena. Similarly, the sphere of actions expands from observational fields to high-tech sophisticated laboratories and software applications.
Typical Course Offerings

**Fall Semester**
- PHC 6000 Introduction to Public Health Epidemiology
- PHC 6002 Infectious Disease Epidemiology
- PHC 6003 Chronic Disease Epidemiology
- PHC 6591 Reproductive Health
- PHC 7015 Advanced Research Methods: Experimental Design *(Enrollment recommended in Fall, Year 1)*
- PHC 7017 Advanced Epidemiology of Health Disparities
- PHC 7606 Tobacco Use: Causes, Consequences, and Control

**Spring Semester**
- PHC 6000 Introduction to Public Health Epidemiology
- PHC 6007 Cancer Epidemiology
- PHC 6013 Epidemiology II: Observational Design
- PHC 6016 Social Epidemiology
- PHC 6062 Systematic Reviews and Meta-analysis
- PHC 6510 Advanced Infectious Disease Epidemiology
- PHC 6934 Scientific Writing & Oral Presentations in Epidemiology
- PHC 7705 Methods in Evidence Based Public Health
- PHC 7011 Advanced Current Research in Epidemiology *(Enrollment recommended in Spring, Year 1)*

**Summer Semester**
- PHC 6009 AIDS Epidemiology and Control
- PHC 6013 Epidemiology II: Observational Design
- PHC 6536 Health Demography

**Epidemiology Graduate Catalog 2022-2023:**
FIU-University of Miami Exchange Program

FIU Doctoral students can complete up to six credit-hours at the University of Miami (UM) as members of the exchange program between FIU and the UM. The exchange program at UM and FIU allows students to take advantage of the broad educational and research opportunities at both institutions. All students who are fully admitted into a doctoral program and in good academic standing may participate in this program. Students can choose from any course at UM provided the course is not already offered at FIU, is not a limited access course and/or does not have additional fees (i.e. many online courses).

A listing of some public health courses offered at the University of Miami can be found here: https://graduatestudies.publichealth.med.miami.edu/academic-programs/course-descriptions/index.html

**Funding for Doctoral Students**

**Presidential Fellowship (Institutional)**
Doctoral student is nominated by the department prior to beginning his/her doctoral studies here. Each program can nominate 2 candidates—a mentor plays a key role in this process; newly admitted
- $30,000/year
- 2 years of stipend support from the University Graduate School (UGS)
- 1 additional year of funding support from the fellow's graduate program
- 3 years of support via tuition waiver and health insurance from the UGS
- Additional information: https://gradschool.fiu.edu/students/funding/fellowships/

**McKnight Doctoral Fellowship (Statewide)**
Graduate student applies for and brings the funds with him/her (statewide FEF foundation); newly admitted
- $22,000/year
- $12,000 from the Florida Education Fund for the 1st 3 years
- $10,000 from the University Graduate School for the 1st 3 years
- 2 additional years of funding support from the fellow's graduate program (as a Graduate Assistant)
- 5 years of support via a tuition waiver and health insurance
- Additional information: https://gradschool.fiu.edu/students/funding/fellowships/

**FIU McNair Graduate Fellowship (National/Institutional)**
Must have been an undergrad McNair; applicable to all McNairs nationwide, both Master’s and Doctoral; must be newly admitted and nominated by home department/unit.
- $23,000/year
- 2 years of stipend support from the University Graduate School (UGS)
- 2 additional years of funding support from the fellow's graduate program (as a Teaching or Research Assistant).
- Additional information: https://gradschool.fiu.edu/students/funding/fellowships/

**C.V. Starr Scholarship**
The C.V. Starr Scholarship assists students from Latin America and The Caribbean, who are interested in pursuing a doctoral degree in one of the three major disciplines at Stempel College.
- $24,000/year stipend and tuition waiver
- Additional information: https://stempel.fiu.edu/student-life/funding-your-education/

**FIU Scholarships**
- [Stempel College Scholarships](https://stempel.fiu.edu/student-life/funding-your-education/)
- [https://gradschool.fiu.edu/students/funding/](https://gradschool.fiu.edu/students/funding/)
- [https://fiu.academicworks.com](https://fiu.academicworks.com)
- [https://fiu.academicworks.com/opportunities/external](https://fiu.academicworks.com/opportunities/external)
Funding for Doctoral Students

FIU Inclusion Fellowship
The FIU Inclusion Fellowship was created by the University Graduate School to encourage promising undergraduate and master’s students who are underrepresented minorities or people with disabilities, to pursue a Ph.D. degree at Florida International University. The Inclusion Fellowship will support Ph.D. students in any discipline. Preference will be given to students with prior research experience.  
For more details visit: https://gradschool.fiu.edu/students/funding/fellowships/

UGS Veteran’s Fellowship
In honor and recognition of our veterans’ service, the University Graduate School has established the UGS Veteran’s Fellowship. This fellowship provides support to student veterans to pursue their doctoral education at Florida International University. The UGS awards the Veteran’s Fellowship once a year in the Fall term. The fellowship includes four years of support with a $24,800 annual stipend plus a tuition waiver and individual health insurance, provided that the student veteran does not have leftover tuition funds on the GI Bill. If the student veteran has tuition funds on the GI Bill and health insurance is covered by the Armed Forces, UGS will cover the stipend.  
For more details visit: https://gradschool.fiu.edu/students/funding/fellowships/

Doctoral Evidence Acquisition Fellowship (DEA)
The Doctoral Evidence Acquisition (DEA) Fellowship is specifically intended to support doctoral students who have no financial support for evidence acquisition activities or those students whose current means of financial support would significantly interfere with or preclude their ability to collect the evidence needed for their doctoral research.  
For more details visit: https://gradschool.fiu.edu/students/funding/fellowships/

Dissertation Year Fellowships (DYF)
Dissertation Year Fellowships (DYFs) provide support to highly qualified FIU doctoral students during the data analysis and writing phase of their dissertation. It is intended to facilitate the timely completion of high-quality manuscripts and dissertations. Students who are conducting outstanding research in their discipline and have established a notable record of publication during their doctoral studies (in comparison to others in their discipline) are favored in the application process. Dissertation Fellows are expected to graduate within 1 year after receiving the award.  
For more details visit: https://gradschool.fiu.edu/students/funding/fellowships/

Provost Degree Completion Tuition Fellowships
The Provost Degree Completion Tuition Fellowship is intended to facilitate degree completion for Ph.D. students whose Graduate Assistantships (GAs) or UGS Fellowships or other funding have expired and who are nearing the completion of their degree and are facing extenuating financial circumstances that will prevent them from being continuously enrolled in their Ph.D. program.  
For more details visit: https://gradschool.fiu.edu/students/funding/fellowships/

Provost Employer Supported Tuition Fellowships
The Provost Employer Supported Tuition Fellowship will be provided for Ph.D. students for whom the employer either pays the assistantship or allocates time for their employee to pursue the degree.  
For more details visit: https://gradschool.fiu.edu/students/funding/fellowships/

Dissertation Milestones for Doctoral Programs

Milestone #1: Establishment of Dissertation Committee (formerly D1 Form)
- Establish a dissertation committee by mutual agreement with the student and major professor or co-major professors.
- Must meet the University's minimum composition requirements, [https://policies.fiu.edu/files/780.pdf](https://policies.fiu.edu/files/780.pdf).
- Include a 250-Word abstract of your proposed research project (Approximately a one-page, double-spaced document in a Word or PDF format attachment).*
- Include the expertise of your proposed dissertation committee in relation to your proposed research project (in the “Enter Expertise” fields you must state how their expertise will contribute to your proposed research project).*
- Please make sure to provide the 250-Word Abstract (one-page, double-spaced document) and in the “Enter Expertise” fields clearly explain how your proposed dissertation committee will contribute to your proposed research project. Otherwise, this online form will be returned. You will be able to submit a new Appointment of a dissertation committee accordingly.

Milestone #2: Doctoral Candidacy Exam (formerly D2 Form)
- Complete all coursework and required number of credits.
- Pass all comprehensive and qualifying examination(s) as established by each academic department. These may include language requirements or other departmental requirements
- Maintained a 3.0 or higher cumulative GPA
- Cleared any incomplete grade(s)
- Any transfer of credits must be reflected in the FIU transcript prior to submission of this dissertation milestone.
- In general, doctoral students advance to candidacy with a minimum of 60 graduate credits.
- Approved candidacy is required to commence dissertation credits enrollment.

Milestone #3: Defense of Dissertation Proposal (formerly D3 Form)
- Complete original research proposal
- Complete required Responsible Conduct of Research Certification (RCR).
- If proposal project involves human or animal research, approval memos such as IRB/IACUC/IBC, respectively, are required.
- For all information about RCR, online research training, refer to [https://gradschool.fiu.edu/rcr/](https://gradschool.fiu.edu/rcr/).

Milestone #4: Preliminary Approval of Dissertation and Oral defense of Dissertation (formerly D5 Form)
- Written dissertation must conform to the standards of presentations as described in the University Graduate School manual for Electronic Theses and Dissertations.
- Public presentation of dissertation to the University Community to be held on a business day during the regular term
- Due at the UGS by no later than three weeks prior to the proposed date or the UGS filing deadline (whichever date is the earliest).
- Click Here to Learn about the Request for Oral Request Process: [https://gradschool.fiu.edu/oraldefensesubmission/](https://gradschool.fiu.edu/oraldefensesubmission/)
Milestone #5: Submission of Electronic Dissertation Final Document (formerly EDT Form)

- Final written dissertation for preservation in the University’s Digital Commons.
- For SACS accreditation, a full version of the Curriculum Vitae must be provided (this is different from the 2-page VITA).
- For PhD candidates, a Certificate of Completion from Survey of Earned Doctorates is required. Complete this at https://sed-ncses.org/login.aspx.
- Click Here to Learn about the Final ETD Process: https://gradschool.fiu.edu/the-final-etd-process/
- Important – Please be advised that towards the end of the term (check academic calendar), you will receive an email from us with instructions to upload your final manuscript to Digital Commons. Hence, it is essential to submit your online Final ETD to us by no later than the due date.

More information on Dissertation Milestones can be found here: https://gradschool.fiu.edu/online-dissertation-milestones/#toggle-id-5
Benchmarks for Success

Year 1
☐ Transfer MPH credits toward the PhD degree, Fall Semester.
☐ Identify prospective Major Professor, Fall Semester
☐ Paper #1: Begin working on a peer-reviewed manuscript as a co-author or first author, Spring Semester.
☐ Identify a data source for the dissertation and begin developing specific aims for the dissertation, Spring Semester.
  ○ It is recommended that the Department Chair and PhD Director review the specific aims.
☐ Complete Milestone #1, Spring Semester.
  ○ Dissertation committees: (1) Committees must have a minimum of four members. (2) The chair of the committee must have Dissertation Advisor Status (DAS) and must have specialized academic competence in the student’s major field as demonstrated by research and scholarly work. (3) In all cases, at least two members of the committee must hold Graduate Faculty Status and be members of the program where the student is seeking the doctoral degree. (4) The committee may consist of four FIU faculty who are members of the graduate faculty; or three FIU faculty who are members of the graduate faculty and one member from outside the institution who has been reviewed and approved by the academic unit and the University Graduate School.
☐ Begin working on the dissertation proposal, Summer Semester.
☐ Lead one departmental presentation (e.g., Research in Progress, Journal Club) during the academic year.

Year 2
☐ Finalize the dissertation proposal 14 business days before the oral presentation, Fall Semester.
  ○ The student must ensure that the Major Professor and dissertation committee have sufficient time to review the dissertation proposal.
☐ Complete Milestone #2 and #3, Fall Semester.
☐ Paper #1: Submit a peer-reviewed manuscript as a co-author or first author, Spring Semester. *One manuscript is a minimum.*
☐ Paper #2: Begin working on a peer-reviewed manuscript as a first author, Spring Semester.
☐ Dissertation: Begin the first dissertation paper, Spring Semester.
☐ Lead one departmental presentation (e.g., Research in Progress, Journal Club) during the academic year.

Year 3
☐ Paper #2: Submit a peer-reviewed manuscript as a first author, Fall Semester. *One manuscript is a minimum.*
☐ Dissertation: Submit the first dissertation paper for peer review, Fall Semester.
☐ Dissertation: Begin the second dissertation paper, Fall Semester.
☐ Dissertation: Submit the second dissertation paper for peer review, Summer Semester.
☐ Apply for the Dissertation Year Fellowship, Summer Semester.
☐ Lead one departmental presentation (e.g., Research in Progress, Journal Club) during the academic year.
Year 4

- Dissertation: Begin the third dissertation paper, Fall Semester.
- Discuss job searches with your Major Professor, Fall Semester.
  - Students should not apply or accept job offers until they have permission from their Major Professor and Department Chair. Students will not be permitted to graduate until they meet all the departmental requirements and expectations of the Major Professor.
- Dissertation: Submit the third dissertation paper to the dissertation committee, Spring Semester.
- Complete Milestone #4 and #5, Spring Semester.
  - Complete Milestone #4 after the 2 manuscripts submitted for peer review receive a favorable review. A “favorable review” means that at a minimum the student is invited to “revise and resubmit” the manuscript. Manuscript 3 does not need to be submitted for peer review; however, the dissertation committee must indicate that they approve of the quality of the manuscript to complete Milestone #4. The student must ensure that the Major Professor and dissertation committee have sufficient time to review the dissertation. A minimum of 14 business days is required.
- Defend dissertation, Summer Semester.
- Graduate, Summer Semester.
- Lead one departmental presentation (e.g., Research in Progress, Journal Club) during the academic year.

The benchmarks listed above will be considered when you complete your annual evaluation and mentoring plan toward the end of each Spring semester.

Graduation Requirements:
1. Satisfy all requirements for Ph.D. of Public Health in Epidemiology.
2. Must earn a grade of B or better in each course.
3. Complete a minimum of 75 credit hours of graduate level coursework in an approved program.
4. 9 credit hours must be 7000 level courses.
5. Earn a minimum overall GPA of 3.0 in all coursework completed.
6. Complete Dissertation Milestones for Doctoral Programs as per University Graduate School guidelines and deadlines.
7. Meet with Faculty Advisor to receive Graduation Check prior to final semester.
8. Apply for graduation at the Registrar's Office during registration of final semester (See University Catalog for most current deadlines).
Competencies for PhD in Public Health with Epidemiology Concentration

1. Conceptualize an epidemiologic research question from identifying and critically appraising the literature to the formulation of a valid research question and hypothesis.
   a. Review and critically evaluate the literature.
   b. Synthesize available information about a public health issue.
   c. Apply appropriate causal inference.
   d. Identify meaningful gaps in knowledge.
   e. Formulate an original and key hypothesis or statement of research problem.

2. Apply and interpret the results of appropriate statistical analysis for different types of epidemiologic data and understand their limitations
   a. Create and explain appropriate graphical and numerical presentations of epidemiological data.
   b. Calculate and interpret p-values, statistical power and significance level.
   c. Prepare and interpret commonly utilized confidence intervals.
   d. Given a set of data or research question, choose, conduct and interpret appropriate statistical test.
   e. Choose and defend the choice of an appropriate multivariate analyses and accurately interpret the results.

3. Interpret epidemiologic associations within a comprehensive causal framework
   a. Identify criteria for the assessment of causation, use epidemiologic reasoning, and apply causal criteria to epidemiologic studies.
   b. Examine data for confounding, effect modification, and interaction and handle these issues appropriately.
   c. Interpret data analysis results and assess appropriate inference based on results; generalization, validity (internal, external), and limits/strengths of the study.
   d. Understand proximal and distal causal factors and comprehensive causal frameworks.
   e. Critique an epidemiologic paper (for adequacy of study design, appropriate epidemiologic and statistical methods, and interpretation of results and their implications).

4. Synthesize epidemiologic knowledge to advance public health interventions and policy.
   a. Apply the principles of evidence-based public health to a specific problem.
   b. Explain how epidemiological evidence can be used to inform and spur policy initiatives.
   c. Summarize multi-disciplinary and stakeholders approaches to evidence translation and policy making.

5. Comprehend ethical and legal principles pertaining to epidemiological data collection, maintenance, and dissemination
   a. Apply concepts of human subjects protection and confidentiality to epidemiologic research questions.
   b. Explain the nuances of informed consent especially in vulnerable populations and diverse cultures.
   c. Understand the ethical and legal aspects of using human subjects data.
Examination Procedures
All doctoral candidates must pass a candidacy examination (a.k.a. comprehensive exam or qualifying exam) before they can advance to candidacy and begin enrolling in dissertation credits. The candidacy exam can be taken once the candidate has successfully completed all graduate coursework required for his/her program. Once the student has successfully passed the candidacy exam, the student may register for dissertation credits. The student must be registered during the semester in which the exam is given.

Based on the dissertation proposal submitted to the dissertation committee members, questions for the candidacy examination will be formulated. The student will undergo an oral candidacy exam to assess the six concentration competencies in epidemiology. To assess each concentration competency, members of the dissertation committee will submit questions to the Chair of the dissertation committee prior to the date of the candidacy exam. The exam will have a minimum of one question for each concentration competency and have a minimum of 10 questions total.

The candidacy exam will occur after the student presents the dissertation proposal. The dissertation committee will then meet with the student in private, which will be closed door to conduct the candidacy exam and evaluate the student on the concentration competencies for epidemiology that they will need to advance to doctoral candidacy. The competencies are available on page 20. The candidacy exam will be approximately 45 minutes to an hour long.

Examination Committee
The Doctoral Candidacy Examination Committee will be comprised of the dissertation committee.

Exam Assessment
Response for the candidacy exam will be evaluated using the following scoring rubric: (0) Does Not Meet Expectations; (1) Partially Meets Expectations; (2) Meets Expectations; and (3) Exceeds Expectations.

For a grade of “pass,” the student must score an average of 2.0 or higher on each competency to pass the candidacy exam. Although the dissertation committee may make recommendations for additional coursework, readings, or research training that they believe will help the student as he/she completes his/her dissertation research, advancement to candidacy is not contingent upon the student following the recommendations. If students pass the candidacy examination, they may advance to Doctoral Candidacy.

Students that do not pass the candidacy exam may be allowed to retake the examination at the discretion of the committee. If so, the committee will delineate specific recommendations for further coursework, readings, etc., to complete before re-examination. The re-examination must be scheduled within 12 months of the date of the first exam. Students may be re-examined one time only. If they fail a second time, the student’s status as a PhD student will be terminated.
Instructions: To assess the six concentration competencies, members of the dissertation committee will submit questions to the Chair of the dissertation committee prior to the candidacy exam. Exam questions must be relevant to the dissertation proposal and the science of epidemiology to evaluate each competency. The Chair of the dissertation committee will document the exam questions using the table and format below. After completion of the candidacy exam, the Chair of the dissertation committee must submit the candidacy exam questions and the competed evaluation rubric to the graduate program director.

# Candidacy Examination Rubric

**PhD in Public Health with Epidemiology Concentration**

**Student Name:**   
**Date:**

**Instructions:** Following the dissertation proposal, the student will undergo an oral candidacy exam to assess competencies for the PhD in public health with epidemiology concentration. Members of the dissertation committee must submit exam questions to the Chair of the dissertation committee before beginning the candidacy exam. Exam questions must be relevant to the dissertation proposal and the science of epidemiology to evaluate each competency. Using the scoring rubric below, each dissertation committee member must evaluate the student on each of the following six competencies. The student must score an average of 2.0 or higher on each competency to pass the candidacy exam. After completion of the candidacy exam, the Chair of the dissertation committee must submit the candidacy exam questions and the competed evaluation rubric to the graduate program director.

**Scoring Rubric:**
(0) Does Not Meet Expectations  
(1) Partially Meets Expectations  
(2) Meets Expectations  
(3) Exceeds Expectations

Dissertation Proposal Guidelines

Formatting Notes: Use Arial 11-point font, minimum 0.5-inch margins; Maximum 10 single-spaced pages for Sections II – VI; Maximum 1/2 single-spaced page for Section VII; Maximum 1/2 single-spaced page for Sections VIII & X; Maximum 1/2 page for essential figures or tables. Maximum 3 pages for Section IX.

1. **Title Page**: Project title, student’s name, chair of committee, committee members, and date. If your committee is not yet formally constituted, indicate potential committee members you are considering, including a Chair, who must have been selected.

2. **Specific Aims & Rationale**: List the research immediate aims in terms of hypotheses to be tested or research questions to be answered. The purpose of the research should be specified, in order to indicate the long-term importance of the specific information being sought through this study. This section must not exceed 1/2 to 1 page in length and often can be shorter.

3. **Background and Significance**: Describe the scientific context for the study, briefly summarizing previous related research. This should NOT be an extensive literature review. Keep references to a minimum by citing only the most relevant. This section should focus on the gaps in knowledge the proposed research will help to fill. This section should not exceed 4 pages in length.

4. **Methods**: The format of this section may be tailored to meet the needs of the specific study being proposed. However, the following sub-headings usually apply. This should be the longest section of the proposal and can be up to 5 pages in length.
   a) **Study design**: Define a) the study design, b) the primary exposures to be evaluated (or interventions to be implemented), c) how the primary exposures would be assessed and quantified (if applicable), d) outcomes to be assessed and their definition, and e) the key covariates and their definition.
   b) **Study setting**: Describe the location, organizational context, clinical site(s), or other setting in which the research will take place.
   c) **Study subjects**: Indicate the source(s) of study subjects, criteria for eligibility, and the anticipated number to be studied.
   d) **Data collection**: Describe the sources of key data items. When applicable, the sequence of data collection activities for a typical subject should be given. A diagram can be helpful when data will come from several sources or when multiple observations are to be obtained over time. If there are plans to monitor and assure data quality (such as duplicate data for some or all subjects, cross-checks of one data source against another), briefly describe them.
   e) **Data analysis**: Describe how the data will be organized to address each of the specific aims and/or hypotheses mentioned in Section A. Specify the statistical techniques to be used. Dummy tables or figures are recommended.
   f) **Study Power**: Summarize the results of statistical power or sample-size calculations.

5. **Limitations**: Briefly describe the most important factors limiting conclusions to be drawn from the study and, the ability to adequately test the primary hypotheses.
6. **Timeline**: Provide an approximate timeline for completing the project. Indicate the current status of the project, including plans for funding.

7. **References**: Provide citations to literature references used in the proposal.

8. **Data Collection Requirement**: If applicable, describe how the requirement of original data collection will be met by this project. Student’s conducting secondary data analysis may state so in this section.

9. **Human Subjects**: Describe the human subjects and ethical issues to be addressed in this project.

10. **Student's Role**: Describe your role in the project (e.g., idea, funding, design, data collection, data management, analysis). If the student is using data already collected by another professor or faculty, he/she must state their role in coming up with the dissertation research project.

    Students are also required to prepare an abbreviated proposal for the University Graduate School. Guidelines for the University Graduate School are available at: http://gradschool.fiu.edu/documents/Proposal_Guidelines.pdf.

    *Sample dissertation proposals can be found here:*
    http://gradschool.fiu.edu/thesis-dissertation/
**Proposal Defense Rubric**
PhD in Public Health with Epidemiology Concentration

**Student Name:_________________________ Date:_________________________**

**Instructions:** Using the scoring rubric below, each dissertation committee member must evaluate the student’s dissertation proposal on each of the following five content areas. The student must score an average of 2.0 or higher on each content area to pass the dissertation proposal defense. The completed evaluation form must be submitted to the graduate program director.

**Scoring Rubric:**
(0) Does Not Meet Expectations
(1) Partially Meets Expectations
(2) Meets Expectations
(3) Exceeds Expectations

<table>
<thead>
<tr>
<th>Content Areas</th>
</tr>
</thead>
<tbody>
<tr>
<td>Project Summary: (1) Clearly state the purpose and objectives; (2) The intellectual merit of the project is clearly stated; and (3) Broader impact of the research clearly stated.</td>
</tr>
<tr>
<td>Introduction to Problem: (1) Describe the scientific problem; (2) Provide the context to the problem; (3) Explain the relevance of the problem being addressed; and (4) Describe previous research relevant to the problem.</td>
</tr>
<tr>
<td>Methodology: (1) Describe and use concise definition of methods; (2) Describe the potential sources of errors; and (3) Provide a clear timeline to carry out the project.</td>
</tr>
<tr>
<td>Organization, Illustrations and Tables: (1) The proposal is clearly organized as described in the guidelines; and (2) All illustrations and tables are labeled in a systematic manner.</td>
</tr>
<tr>
<td>Budget and Budget Justification: (1) Items are prioritized and realistic and well justified; (2) Describe all items necessary for the project; and (3) Provide a clear justification of all items needed for the project.</td>
</tr>

26
Dissertations can be completed using one of two formats; however, the major professor determines which of the following formats the student will use. Major Professors are encouraged to use the manuscript format. Regardless of the format, all dissertations must be checked for plagiarism using Turnitin or other software/platforms approved by UGS.

**Manuscript Format** (preferred format)
PhD students in public health with a specialization in epidemiology are expected to write three cohesive manuscripts related to the dissertation project.

- Manuscripts #1 and #2 must be submitted for peer review and receive a favorable review. A “favorable review” means that at a minimum the student is invited to “revise and resubmit” the manuscript.
- Manuscript #3 does not need to be submitted for peer review; however, the dissertation committee must indicate that they approve of the quality of the manuscript to complete Milestone #4.

**Traditional Format**
Alternatively, PhD students in public health with a specialization in epidemiology can use the traditional dissertation format. Below is an outline of the traditional format. More details on the traditional format can be found here: http://gradschool.fiu.edu/thesis-dissertation/

*Traditional Format Outline*
- Title Page
- Dedication (optional)
- Acknowledgments (optional)
- Abstract
- Table of Contents
- Chapter 1
  - Introduction
- Chapter 2
  - Literature Review
  - Specific Aims and Hypotheses
- Chapter 3
  - Methods
- Chapter 4
  - Results
- Chapter 5
  - Discussion
- References
- Vitae
- Appendices
### Instructions:
Using the scoring rubric below, each dissertation committee member must evaluate the student’s dissertation defense on each of the following three content areas. The student must score an average of 2.0 or higher on each content area to pass the dissertation defense. The completed evaluation form must be submitted to the graduate program director.

**Scoring Rubric:**

By signing this student agreement, I acknowledge that I was provided a copy of the “Department of Epidemiology Doctoral Student Manual.” I also acknowledge that I understand the Florida International University policy number 380.044 which states the following:

**Academic Dismissal:**
1. Failure to maintain good academic standing will result in placement on academic warning, probation, or dismissal.

**Warning:**
1. A graduate student whose cumulative graduate GPA falls below a 3.0 will be placed on warning, indicating academic difficulty.

**Probation:**
1. A graduate student on warning whose cumulative graduate GPA remains below 3.0 in the following semester will be placed on probation, indicating serious academic difficulty. The College or School of the student on probation may indicate the conditions which must be met in order to continue enrollment.

**Dismissal:**
1. A graduate student on probation whose cumulative and semester GPA’s fall below a 3.0 will be automatically dismissed from his or her program and the University. A graduate student will not be dismissed prior to attempting a minimum of 12 hours of coursework as a graduate student. The student has ten working days to appeal the dismissal decision.
2. A student may be dismissed for failure to make satisfactory progress toward degree completion or failure to complete all the requirements for a graduate degree within the time limits for degree completion.
3. A student may be dismissed for non-compliance with the continuous enrollment policy for doctoral students who have advanced to candidacy or master’s students with an approved research proposal.

_Examples of unsatisfactory progress toward degree completion include: not completing a Fall or Spring student evaluation, not achieving the SMART goals on two consecutive semesters, and not achieving the “Benchmarks for Success.”_
